

Random Ideas

- ~ Corresponding background effects for currently active variant(varient being sun or moon)
- ~~ Could be sparkles when moon is active, and it could encompass the whole page or just over the header graphic
- ~ Custom scroll bar. Those always look nice. We could have it be a little icon in the scroll bar
- ~~ Should we have the little icon, it could follow the scroll as it goes down, maybe changing moon phases with it. Sun too, but does a sun have phases?
